

Florapeat CKS0

Substrate based on average structure

Florapeat CKS0 is a basic product for the manufacture of substrates on the site. The base substrate is composed of natural turf, neutralized with a wetting agent to the initial irrigation easier, no fertilizers were added other ingredients. The substrate is available in all our different structures, the correct structure can be chosen depending on the destination - size containers, plant size, length of growing period, etc.

The substrate is 100% natural, high damping capacity, water and air porosity, is a virus and weed free.

To ensure maximum performance and density, please peat water before use at the opening of the bag, this improves the decompression process

BOTANIC CHARACTERISTICS

Sphagnum species Sp
Decomposition H2-H4
Organic matter content 85% Min
Max ash content 15%

CHEMICAL CHARACTERISTICS

N8-20 mg / l
P2057-16 mg / l
K201-3 mg / l
CE ≤ 0,1 mS / cm

PHYSICAL PROPERTIES

Structure 1-10, 0-20, 6-20 mm
Density 140-160 kg / m³ o
180 a 200 kg / m³
Absorption 7-8 times its own weight of dry matter
Dry Substance 80 g / l
Humidity 40-60%
